SUMMARY

MERN Stack Developer with hands-on experience building web applications using MongoDB, Express.js, React.js, and Node.js. I enjoy working on real-world projects and have a growing interest in AI and Machine Learning. Currently learning how to combine AI with web development to build smarter, more useful applications. Always curious, always learning, and looking forward to new challenges.

PROJECTS

Document Verification System   *2024 – 2025*

- Developed a block-chain based document verification system ensuring secure and tamper-proof storage.
- Built Solidity smart contracts on Hardhat and integrated IPFS for decentralized document storage.
- Designed a MERN stack (MongoDB, Express.js, React.js and Node.js) frontend for seamless block-chain interaction.

AI OS Assistant   *2023 – 2024*

- Designed and implemented an AI-powered OS Assistant to enhance productivity and simplify daily tasks.
- Integrated scheduling, information retrieval, file management, and personalized recommendations for seamless user support.
- Utilized Python, Machine Learning, and Rasa NLP with a Tkinter-based UI for intelligent interactions.

Pharmacy Management System   *2022 – 2023*

- Implemented a real-time inventory management system for automatic stock level tracking and updates.
- Created a customer management system to store details, prescription history, and purchase behaviour.
- Automated prescription processing to improve accuracy and reduce manual errors in medication dispensing.
