SUMMARY

Frontend-focused Full Stack Developer with professional experience building production React.js and TypeScript applications in a product environment. Strong in reusable component libraries, complex UI development, state management (Redux), responsive design, and platform consolidation across multiple products. Additional experience with Next.js, Node.js, Express, Prisma, PostgreSQL, MongoDB, REST APIs, and AI/LLM integrations. B.E. in Artificial Intelligence & Machine Learning with a Best Research Paper award. Seeking Frontend or Full Stack roles in product-driven teams where I can own features end-to-end and contribute to scalable, high-quality user experiences.

EXPERIENCE

Associate Software Engineer Oct 2025 - Apr 2026
Leanqubit *Remote*

- **UI Component Library:** Designed and shipped a production reusable component library in React + TypeScript with 12+ core components (Buttons, Toggle, Breadcrumbs, Divider, Tags, Badges, Typography, Tables, Icons, Layouts, Widgets, Modals, and React Flow), used across 4 product modules.
- **Multi-Product Frontend Development:** Developed and enhanced 15+ complex screens across FactoMES, FactoVision, FactoBlaze, and Facto Plan, covering resource management, live production flows (React Flow), simulation, plate counting, dashboards, configuration, navigation, and enterprise hierarchy.
- **Platform Consolidation:** Contributed to unifying 3+ Facto products into a single frontend platform by standardizing shared components, navigation, layouts, and common UI patterns.
- **API Integration & State Management:** Integrated REST APIs across 10+ dashboards and multi-step flows while implementing Redux (feature slices) for application state, session handling, data transformation, pagination, filtering, and form/binding validation.
- **Quality & Ownership:** Resolved 10+ functional and UI defects across modules, wrote Jest unit tests for key components, and independently owned end-to-end feature delivery as a mid-level React developer.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, HTML5, CSS3
Frontend	React.js, Next.js, Redux Toolkit, TypeScript, Tailwind CSS, Jest, Responsive Design, UI Component Libraries, Design Systems
Backend	Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, RBAC, Prisma ORM
Databases	PostgreSQL, MongoDB, MySQL
AI / LLM	LangChain, Grok API, LLM Integration, Agentic Workflows
Tools & Practices	Git, GitHub, GitHub Actions, CI/CD, Postman, Figma, Agile

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning 2025
Mumbai University

PROJECTS

Job Tracker Live | GitHub May 2026 – Present
Next.js, TypeScript, Prisma, PostgreSQL, TanStack Query, Groq API, Chrome Extension

- Built a full-stack job search platform that centralizes application tracking, resume versioning, analytics, AI-assisted recruiter emails, and automated follow-ups.

- Implemented a production-ready architecture using Next.js App Router, Prisma, PostgreSQL, session authentication, Cloudinary resume storage, scheduled emails via GitHub Actions, and token-secured Chrome extension APIs for one-click job capture.
- Designed dashboard metrics, Kanban pipeline, search/filter functionality, and Groq-powered insights to analyze search strategy, response rates, resume performance, and follow-up needs.

AI Agentic Habit Tracker GitHub Apr 2026 – Present
Next.js, FastAPI, LangChain, Grok API, PostgreSQL

- Developed a full-stack AI-powered habit tracking platform that generates personalized habit plans and adapts recommendations based on user activity patterns.
- Architected a LangChain-based agent workflow integrated with Grok API, enabling autonomous habit planning, real-time adjustments, and feedback-driven routine optimization.
- Planned scalable backend services with FastAPI and PostgreSQL to manage user data, habit history, and AI-generated recommendations efficiently.

ACHIEVEMENTS

- **Best Research Paper Award** – 4th International Conference on Engineering Excellence, for research on decentralized document verification using blockchain and IPFS.
- **Student Committee Core** – Established a 50+ member technical community and organized 8+ workshops and hackathons across frontend, backend, and AI/ML.
- **Design Lead** – Owned layout, typography, and information architecture for a technical newsletter with 500+ subscribers.

CERTIFICATIONS

- **Data Analysis Using Python** – Anudip Foundation, Mumbai Suburban
- **Full-Stack Web Developer** – LinkedIn Learning
- **React JS Development** – GeeksforGeeks
